	Indus	strial applicability (IA)	Claims Claims	1 - 4	YES NO

2. Citations and explanations (Rule 70.7)

The documents cited in the International Search Report represent the prior art. The claimed invention stated in claims 1-4 is not anticipated by these documents. None of the documents or any relevant combination of them reveals a method and a device for detecting a leak in a reciprocating machinery as described by these claims.

According to the arguments stated above, the invention claimed in claims 1-4 is novel and considered to involve an inventive step. The industrial applicability of the claimed invention is obvious.
